

I support the recommendation of the Busa Land Use Proposal Committee, appointed by the Board of Selectmen, to use the Busa land property primarily as a Community Farm. If any affordable housing is to be built, I support a maximum of 2 units to be built either on already developed land or on that which is least suitable for farming. Further, I support only the "scattered site" type of housing already built in other parts of Lexington by the Lexington Housing Assistance Board (LEXHAB), not a new model for dense housing development with 10-14 units, as proposed by the Lexington's Housing Partnership Board.
